Lituania	Da	Nu
Bulgaria	Da	Da
Norvegia	Da	Da
Romania	Da	Da
Albania	Da	Da
Polonia	?	?
Portugalia	?	?

2. O alta lista cu tarile unde sunt interzise detectoarele de radar (pentru ca este un citat, nu mi-am permis sa-l traduc...)

"In some countries and areas, such as those listed below, using or possessing a radar detector is declared illegal and may result in fines, seizure of the device, or both. Generally these prohibitions are introduced under the premise that a driver who uses a radar detector will pose a greater risk of accident than a driver who does not. Not all research agrees with that premise, such as the 2001 Mori report which suggested that radar detector users on average posed a 28% less risk of accident and also traveled far more miles.

Australia: All states besides Western Australia. They are illegal to sell, purchase or possess in SA, NSW, ACT & Vic. Radar Detectors are illegal to use in NT, Queensland & Tas.[1]

Belgium: In July 2006 a provisional seizure of a vehicle worth over 75.000 EUR itself was ordered by the courts, destruction of the radar detector itself and the driver's license was suspended for 3 months.[citation needed]

Canada (Illegal: Newfoundland & Labrador, Nova Scotia, Prince Edward Island, New Brunswick, Quebec, Ontario, Manitoba, the Yukon Territory, the Northwest Territories Legal: Alberta, British Columbia, Saskatchewan): Regardless of whether they are used or not, police there may confiscate radar detectors, operational or not, and impose substantial fines.[2]

Egypt

Estonia

Finland

France

Germany 75€ fine , 4 Points, destruction of the radar detector

Greece

Ireland (Republic of)

Netherlands 250€ fine and seizure of the device (since 2004)

Norway

Poland

Portugal

Romania - legal since 2006 (although radar jammers still illegal)

Spain

Sweden

Switzerland, destruction of the radar detector

Taiwan

Turkey

United Kingdom, although not legal to own, but was technically illegal to use under a 1949 wireless act until 1998, due to legal loophole causing them to be legalised suddenly.

United States law varies from state to state, but detectors are generally legal in private vehicles under the Communications Act of 1934[3] and illegal in commercial vehicles by DOT regulation (49 CFR 392.71).

Exceptions:

Illegal in all vehicles: Virginia, Washington D.C., U.S. military bases

Illegal in commercial vehicles under state law: Illinois, New York (specifically, commercial vehicles over 10,000 lb. and all vehicles over 18,000 lb.)

Indirectly illegal: Minnesota and California (illegal to hang anything from the windshield with suction cups; however both dashboard and visor mounting is allowed.) [1]

Repealed: Connecticut (repealed in 1998)

Proposed legislation: Florida [2][3] ,,
